

# Rakshitha YR | Senior QA Engineer

rakshithayr92@gmail.com | +91 9743352232

Software Testing professional with 7 years of experience in Manual and Automation Testing across web applications. Proven ability in creating, executing, and maintaining high-quality test solutions with strong exposure to API, Accessibility, and Globalization testing. Collaborative team player with hands-on experience in Agile delivery and ownership of end-to-end testing cycles.

## Skills

- **Manual Testing:** Functional, Regression, UAT, End-to-End, Exploratory, Globalization testing.
- **Automation Testing:** Selenium WebDriver, Autometrics, VS Code, TTS Avisto Framework
- **API Testing:** REST API testing using POSTMAN.
- **Accessibility Testing:** JAWS, NVDA.
- **Testing Processes:** QA STLC, Defect Life Cycle, Test Case Design Techniques.
- **Agile:** SCRUM methodology, sprint testing, grooming, and planning.
- **CI/CD:** Git, Jenkins, Docker (exposure).
- **Test Management & Utilities:** JIRA, VS Code (TTS), WinApproach, WinSCP, Putty.

## Work Experience

### UST Global, Client: Amadeus Software Labs

Global travel technology platform delivering airline booking, distribution, and payment solutions at scale.

**Senior QA Engineer – API Automation** August 2023 – Present

- Automated airline API test suites using TTS and Avisto frameworks compatible with Python 2 & 3, reducing manual regression effort by 60%.
- Collaborated with developers, product owners, program managers, and business analysts to validate complex airline booking workflows.
- Designed airline-specific automated sanity suites, enabling continuous regression validation across providers including FLX, ALTEA NDC, BA, IB, and Navitaire.
- Performed extensive SOAP API testing for booking, payment, fraud detection, and exchange flows, preventing critical production issues.
- Analyzed incident reports and PTRs monthly, resolving over ten issues while improving platform stability and overall release confidence.
- Contributed to effort estimations, backlog refinement, and sprint planning, improving sprint predictability and on-time delivery by 20%.

### Metricstream Infotech Pvt. Ltd.

MetricStream is a global SaaS leader in Integrated Risk Management (IRM) and Governance, Risk, and Compliance (GRC) solutions.

**Platform Dev QA / Member of Technical Staff** May 2021 – August 2023

- Led end-to-end functional, regression, and UAT testing across releases, reducing post-production defects by approximately 35%.
- Automated UI regression suites using Selenium, improving test execution speed and release confidence by 50%.
- Conducted REST API validation through Postman, ensuring data integrity and preventing downstream failures.
- Collaborated with developers and product teams to analyze requirements, resolving over 90% defects within sprint timelines and handled scrum ceremonies.
- Performed globalization and exploratory testing, identifying critical regional and edge-case defects before customer-facing releases.
- Owned system and integration testing activities, significantly improving release stability, defect leakage prevention, and customer satisfaction.

### Fusionmint Technology Pvt. Ltd.

Fusionmint developed a Healthcare Management web application to streamline hospital operations and improve patient care efficiency.

**Software Test Engineer** March 2019 – April 2021

- Designed and executed detailed functional and regression test cases, reducing post-release production issues.
- Performed comprehensive end-to-end testing across healthcare workflows, improving application reliability and overall system stability.
- Maintained and updated test suites for frequent enhancements, reducing regression testing effort and execution time.

## Achievements

- Received **SPOT Award** for raising maximum bugs and proactive contribution at Metricstream.
- Received **SPOT Award** for excellent work on Heatmap deliverable.
- Awarded **Employee of the Quarter** at Fusionmint Technology Pvt. Ltd.
